SISALATION®
The Original and The Best

FACING FOIL
HEAVY DUTY

# Sisalation® Facing Foil Heavy Duty Perforated (450P)

## Product Description

Two outer layers of aluminium foil bonded to high density kraft papers, bonded together with a heavy coating of flame retardant adhesive and reinforced with strands of fibreglass in two directions. The laminate is perforated to provide 11% open space.

## Applications

Sisalation® Facing Foil Heavy Duty (450P) is a Heavy Duty perforated reflective foil laminate recommended for use as a vapour barrier in the lining and lagging of air conditioning ducts, pipes and vessels where acoustic performance criteria are required.

## Specification

**When specifying, state the following:**

Product Name: Sisalation® Facing Foil Heavy Duty Perforated (450P)
Duty: Heavy Duty
Application: Facing Foil

## Physical Properties

Duty before perforation .....Heavy
Open space.....11%
Emittance .....Reflective
Flammability Index.....Low (≤5)

## Chemical Properties

Do not allow contact with wet mortar or concrete: alkalis' attack aluminium foil.

## Standard Roll Sizes

| Roll Width | 1500mm | 1350mm | 1350mm | 1200mm | 1200mm |
|---|---|---|---|---|---|
| Roll Length | 600m | 300m | 60m | 300m | 60m |
| Roll Area | 900m² | 405m² | 81m² | 360m² | 72m² |

Other roll sizes available on application.

## Health and Safety

There are no known health or safety risks associated with this product for applications described in this datasheet. For additional information or to request a Material Safety Data Sheet please visit www.sisalation.com.au or contact your nearest Fletcher Insulation™ office.
